

Journeyx 12.4 Overview

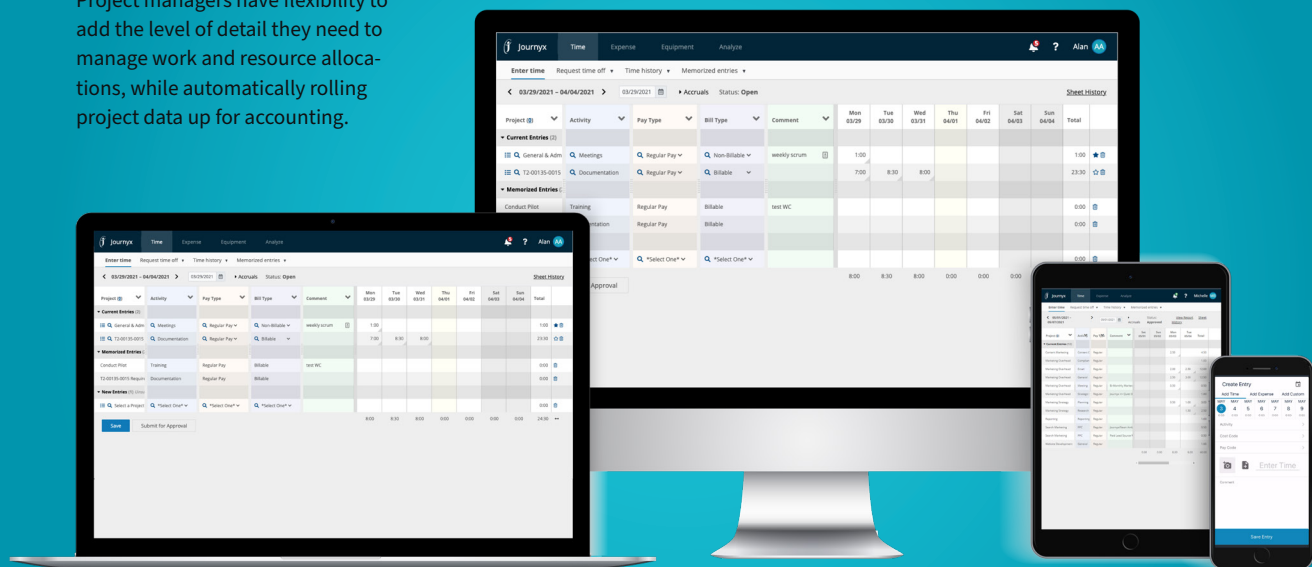

Momentum Product Release – May 2021

Journeyx 12.4.0—the Momentum release—is now available. Featured enhancements in this release include improved user experience (UX) for project management, updated UX to support additional time and expense entry columns, new time-phase data option in standard matrix reports, API key management on behalf of others, and more!

Remove friction with more rollup/drilldown capabilities.

Project managers have flexibility to add the level of detail they need to manage work and resource allocations, while automatically rolling project data up for accounting.

Better UI for end users and management

Consistency, usability, efficiency, configurability

Easier and more secure access to more data

Secure, granular access via API key management

Increased flexibility for project managers

Remove the noise; manage views to see what's important

Assignment Workload Graphs for Journyx PX

Redesigned workload graphs on assignment management and resource availability are more intuitive and make it easier to see resource needs at a glance.

The new design includes chronological assignment details and views for managing large and small assignments with less clutter.

Contact your account manager for more information about the new Journyx 12.4 update!
