

# What's New with Journyx 12.5 & Mobile

November 2021: Opus Release

The release of Journyx 12 in 2019 focused on superior user experience for time, approvals, and visual reporting. Now, with the new November 2021 Journyx 12.5 update, we continue to raise the bar with excellence in user experience for resource allocation, usage monitoring, and mobile app functionality.

In addition to a new Activity Monitor screen for tracking activity and long-running processes by user and request on the core Journyx system, we have some exciting updates to Journyx PX and Mobile...

## UPDATES IN JOURNYX MOBILE

### Biometric login

- New option to use biometric sign in when Journyx login credentials are saved in the app
- Face ID and/or fingerprint sign in available if you have biometric information on your device

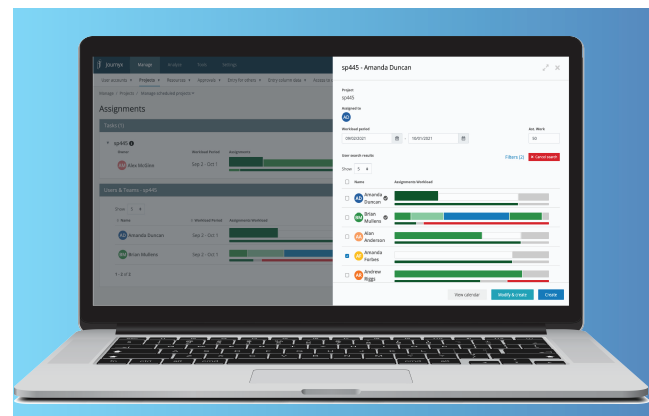

### Time submission flexibility

- New option to submit future timesheets when time is logged in a future period
- Support for the interim submission feature for submitting partial sheets

## UPDATES IN JOURNYX PX

### Assignment workflows/screens

- Complete UX overhaul of task assignment process and workflows for improved usability and efficiency
- Resource assignment delegation for break-down of existing team assignments into individual assignments
