

What's New with Journyx 12.6

May 2022: Pathway Release

The release of Journyx 12 focused on superior user experience for time, approvals, and visual reporting. Now, with the new May 2022 Journyx 12.6 ("Pathway") update, we continue to raise the bar with performance enhancements and even more control over the amount of data and level of detail you see.

UPDATES IN JOURNYX JX

Dashboards/reports control

- Customize how much data is shown in standard report and dashboard charts

Manager approval updates

- Full sheet view for timesheet and project approvals
- Project descriptions shown on Days view

User management optimization

- Updated user management screen to more intuitive and customizable interface

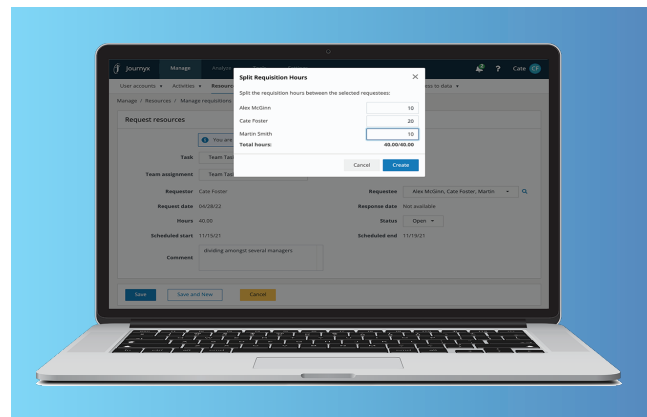

Leave request flexibility

- Request leave on behalf of others
- Customize time parameters for leave requests to eliminate errors and comply with business needs

UPDATES IN JOURNYX PX

Resource requisition improvements

- Updated resource requisition management screen with newer, more modern interface for improved customer experience
- Resource requisition requests can now be sent to multiple managers with automated stakeholder email notifications
