

What's New in Journyx JX/PX v13.2

1st Half 2024 (2024H1)

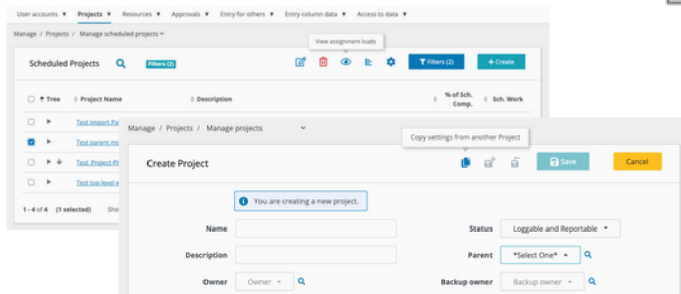

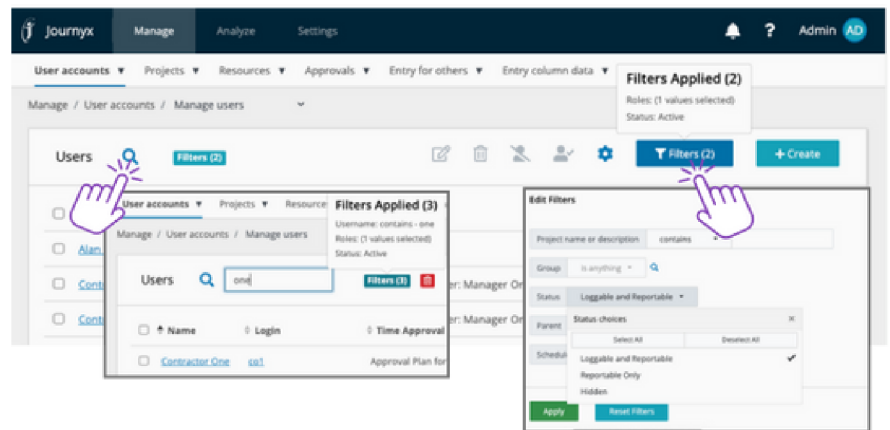

Journyx is consistently on a quest to improve and upgrade our products and customer experiences, with two major releases each year. Journyx JX/PX version 13.2 provides lots of goodness for power users and Journyx admins!

This release gives you an easier and more modern user experience for managing users, projects, and other information in the Journyx system.

Updates in Journyx JX (project time tracking) products:

Highlights of this release:

- Modern search experience: more options while reducing screen real estate

- Easier-to-access actions and buttons at the top of management screens

Updates in Journyx PX (resource management) products:

- Visual reporting for Billable Forecast and Utilization/Chargeability reports
- Daily resource allocation feed for consumption by third-party reporting tools
