

What's New in Journyx JX v13.3

2nd Half 2024 (2024H2)

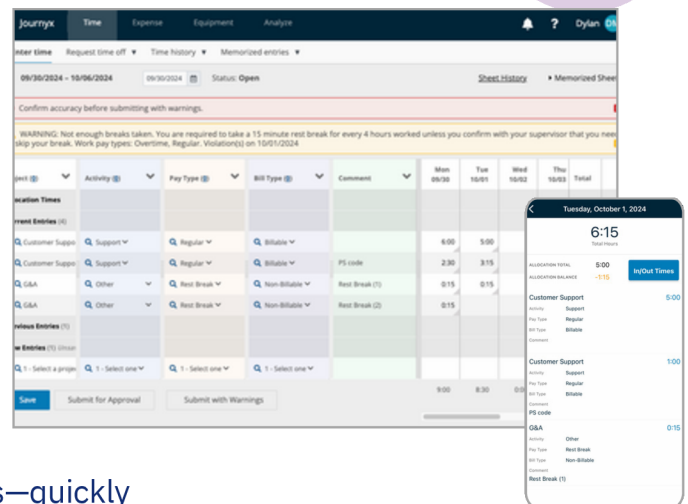

Journyx consistently improves and upgrades our products and customer experiences, with **two** major releases each year. Journyx JX version 13.3 provides much-requested features and back-end improvements to make your jobs easier and your data even more powerful!

Journyx JX (project time tracking) product updates

Highlights of this release:

- **Wage law compliance functionality***
 - Track required breaks and alert employees/approvers to exceptions
 - Track overtime/double time totals on-screen as employees log time
 - Customize messages for exceptions
 - Enforce wage law criteria for browser and mobile time entry
- **Journyx Scout, your AI-based assistant***
 - Ask questions of your time data to get answers—quickly
 - Directly access using the standard Analyze menu
 - Create reports quickly and export easily for continued analysis
- **New RESTful API** (*customer training coming soon!*)
 - New, searchable documentation and tutorials for the Journyx RESTful API
 - Includes option to test methods for success
 - Batch handling included for optimal performance
 - New methods for leave request management available
- **New cloud-to-cloud integration management from the browser***
 - Manage 3rd party integration settings and maintenance directly in Journyx
 - Initial offering includes cloud connection and data sync for Dynamics 365 Finance and Operations
 - Upgrades occur when your regular Journyx software is updated

**Many of the new features in Journyx 13.3 require special license keys to unlock. Please contact your account manager to evaluate any of these new features.*
