

# What's New in Journyx JX v13.4

1st Half 2025 (2025H1)

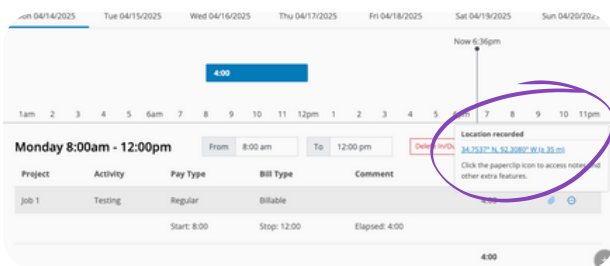

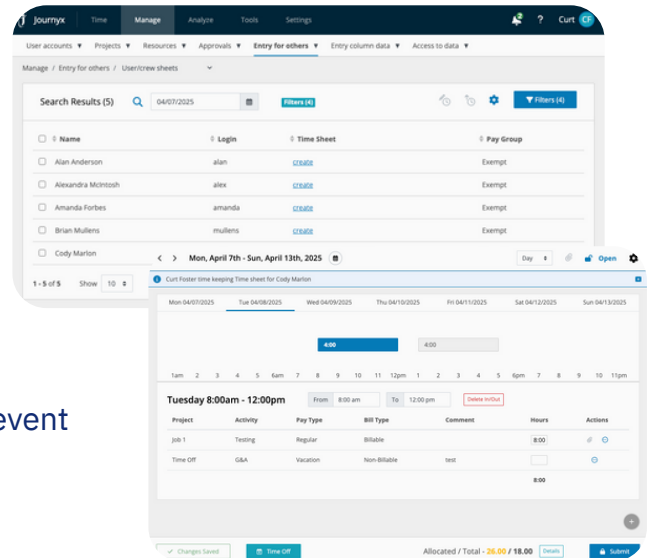

Journyx consistently improves and upgrades our products and customer experiences, with **two** major releases each year.

Journyx JX version 13.4 provides much-requested features for your field service teams.

## Journyx JX (project time tracking) product updates

Highlights of this release:

- **Supervisory editing of employee time entry**
  - Better ability to manage end-to-end job tracking
  - Edit employee start/stop times and/or fix missed punches
- **Improved accruals management**
  - More granular point-in-time accuracy
  - Get balance totals for accruals management event tracking
  - Better reporting capabilities for accruals

- **Geolocation tracking**
  - Track in/out times by location for users entering time via web browser and/or mobile app
  - NOTE: Geofencing—the ability to restrict time entry to a specified area—will be coming in the 25H2 release...stay tuned!

- **Upgraded Dynamics 365 F&O integration** (also known as Dynamics 365 Finance or SC&M)
  - Version 1, released in October, 2024, included everything you need to set up time tracking in Journyx for your existing F&O data
  - Version 2, included in this release, adds the ability to automate pushing approved time data back into F&O for your financial reporting, payroll, and/or billing needs
