

Journyx Timesheet & ProjectXecute v9.0

New Features

Version 9.0 of Journyx Timesheet and ProjectXecute includes a variety of improvements and new features to make it easier to run your business and increase profitability. Version 9.0 is focused on giving your people the right level of access and the right information in order to manage your enterprise time tracking processes more effectively.

The Right Level of Access Through Role Abilities

Version 9.0 of Timesheet and ProjectXecute includes an expansion of the custom role abilities that are available in earlier releases. It also includes more granular control of some existing abilities. The role ability work is focused on giving division and business unit managers the power to fully manage a set of employee groups without requiring full system (“Administrator”) access.

Details on the new and improved role abilities include:

- User interface improvements to make it easier to see what abilities are available and what abilities are included in existing custom roles
- Copy settings feature to copy all of the abilities/selections from a default or custom role when creating new roles
- Abilities to manage the Groups and items in the Groups a manager belongs to
- Manager abilities to customize Entry Screen layouts and options for employees
- More granular manager abilities to create and customize their groups’ Period Approval plans
- Manager abilities to change entry Time Periods for employees in their groups
- Abilities to control values in the Entry Column select lists for a manager’s groups
- Manager abilities to set up and/or edit Custom Fields
- Abilities to create and manage Holiday Schedules for the groups managed
- Option to add or remove access to Records Management
- Abilities to import Rate Rule and Policy details from files and third party systems
- Abilities to protect the User Login field from undesired changes

The Right Information for Managing Your People

Version 9.0 includes new reports and notifications that give your managers the information they need to fully oversee the employees they are responsible for. In addition to the reports on their time, expenses and projects, managers will be able to see meta-data for individual employees such as the last time the employee logged into the Journyx system and login failures.

(Continued on the next page)

Details on the new and improved manager information include:

- System report on the last login time/date of employees currently logged into the system
- System report of login failures for employees currently locked out
- Option to run the system report for login information in Journyx Reportlink
- Email reminders for managers when they are late approving their timesheets and expenses
