

# Journyx Time Tracking for Business Central

Smart time tracking to drive growth at every level.

Journyx is a one-of-a-kind **time tracking software** that **integrates smoothly with Microsoft Dynamics Business Central** (BC). With Journyx's integrated timesheet solution for Business Central, time and expense entry for jobs, billing, and payroll has **never been easier**.

## Get the most out of 2 best-of-breed cloud apps that integrate smoothly

- Automated connection and bi-directional data sync (no manual transfers required)
- Flexible options for matching up data from one system to the other
- Both apps are fully supported and actively extended/improved

## Set up access to job tasks and other data

- Automatic setup and maintenance of job taxonomy and user access to proper tasks
- Enable users to see only their own tasks on their timesheets
- Timesheet approval workflows set up based on org chart structure

## Stop wasting time and losing money on timesheet errors and corrections

- More accurate time entry for jobs, billing, and payroll
- Eliminate errors and time-consuming corrections after time data is processed/posted/billed/paid
- Custom rules that prevent timesheet users from making mistakes
- Flexible timesheet approval processes

## Use job task planning lines to manage resource allocation and capacity\*

- Give users access to task assignments in their timesheets with estimated dates and hours
- Allow users to log actual work hours against task assignments from BC
- View all assignments across your resource pool to search for availability and monitor work capacity
- Effective tools to develop job budgets and forecast delivery times and profitability
