

Partners for Asset Integrity Management

You + Journeyx:
Let's Grow Together

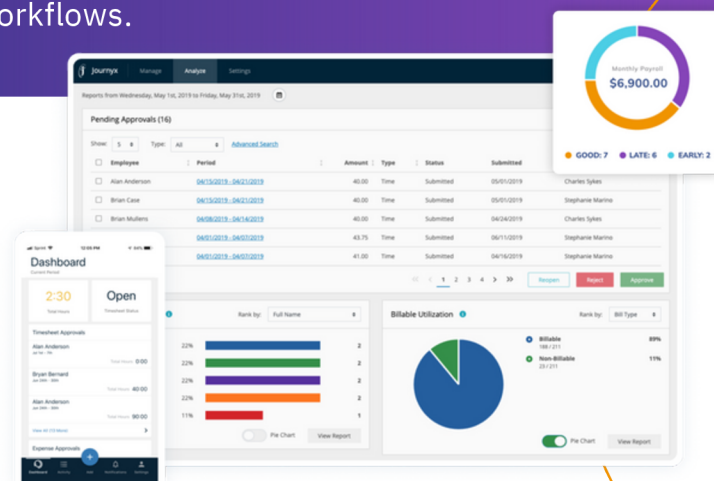

Journeyx is a proven time tracking solution designed for **field-heavy, compliance-sensitive, project-based operations**—like those in Energy, Utilities, and Infrastructure Asset Integrity Management (AIM).

We help clients **improve labor cost accuracy, speed up billing and cost recovery, and strengthen audit defensibility**—especially when managing field crews, subcontractors, or complex project workflows.

Why It Matters

Your clients are under pressure to:

- Accurately track labor across **inspection, maintenance, or compliance work**
- Reconcile project hours across **sites, assets, and vendors**
- Defend labor charges in **audits or grant reimbursement processes**
- **Bill faster**—and with fewer disputes

Yet, most companies in these industries still rely on spreadsheets, generic systems, or clunky mobile apps. That's where we come in.

Ideal Referral Scenarios

You're a great fit for partnership if your clients...

- Work in **midstream energy, public utilities, or infrastructure maintenance**
- Need better time/labor tracking for **compliance or cost recovery**
- Manage **field crews, subcontractors, or reimbursable labor**
- Ask for **timekeeping solutions** (*and you don't offer one*)

Integrations

Why Partner with Journyx?

- **Add Value** to your solution or service without adding overhead
- **Integrate Easily** with ERP, payroll, asset/maintenance platforms
- **Create New Revenue** through referral fees or packaged offerings
- **Collaborate on Content** – thought leadership, webinars, co-branded collateral
- **Easy to do Business with** – we value our partners, and it shows!

Ideal Partner Fit

We're actively building partnerships with:

- System integrators
- Field services consultants
- Maintenance & AIM contractors
- Energy and utility associations
- Complementary software vendors
